Overall Summary

REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	106 742	22 744	17 695

Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies

Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. REACH Registration statistics

Norway

Data as of: 30/06/2024

Overall Summary

REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	526	336	117

Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	68	63	15
registered as intermediate	15	15	3
<i>Transported isolated intermediates</i>	11	11	3
<i>On-site isolated intermediates</i>	13	13	1
NONS Notifications (claimed but not updated)	0	0	0

Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
Registrations in Joint Submissions	82	77	16
